

**Exosomics Announces Its First World-Renowned
Scientific and Clinical Advisory Board Member Appointment
by Welcoming [Dr. Ruggero De Maria, MD, PHD](#)**

Siena, Italy- Exosomics S.p.A., a pioneer and world leader in exosome-based Precision Medicine Solutions and Cancer Diagnostics, is proud to announce that Dr. Ruggero De Maria MD, Ph.D. has joined its newly formed Scientific and Clinical Advisory Board (SCAB).

Dr. De Maria is President of the Italian Institute for Genomic Medicine; President of the Alliance Against Cancer (ACC), a network that brings together the most important cancer centers in Italy; and a member of scientific advisory board of important international organizations, such as the Center for Tumor Diseases in Germany, the National Foundation of Cancer Research in the United States and the Cordeliers Research Centre (CRC-ISAB), France.

Dr. De Maria is an internationally renowned researcher and oncologist and the Professor/Director of General Pathology Institute at the Catholic University in Rome. Professor De Maria has extensive experience in oncology research gained in Italy and abroad, has directed research teams and has conducted several studies supported by national and international funding.

“With his outstanding and deep scientific experience in clinical trial design, Dr. De Maria will enhance the range and depth of expertise in Exosomics. His appointment to SCAB will allow acceleration of the company’s development and commercialization activities for its innovative, launched Precision Medicine solutions and for its future early cancer detection platform Cancer-rEVeal,” said [Behzad Mahdavi, Ph.D., MBA](#), Chairman of the Board of Exosomics and VP of Strategic Innovation & Alliances at Lonza.
